

Pocketful — Autonomous Zero-Sum Fintech Engine

Decoupled 3-Seat Autonomous Factory & Bitemporal Ledger

Strict Zero-Sum Conservation

Mathematical guarantee across balances, holds, and escrows: $\text{Sum}(\Delta) = 0$.

SHA-256 Chained Audit

Immutable cryptographic hash chain rendering historical ledger records tamper-proof.

AML Sentinel Engine

Real-time velocity anomaly detection, micro-structuring deterrence, and split fraud analysis.

Production Verification & Test Contracts

193 / 193 Contract Tests Passed | 0 Harness Problems

193 / 193

Tests Passed

Continuous progression across Stages 1, 2, 3, and 4 without regressions.

0 Problems

Harness Gates

Passed structural, contract, and deployment gates cleanly.

100%

Zero-Network Container

Offline verifiable container and serverless edge deployment on Vercel.
